- Your engagement in it will be kept fully confidential, from attendance to any proposed question*

CRANE – Quick overview

CRANE ambition

Move 70-80% of chronic patients to self-management by intensive use of data

Develop a new healthcare model based in two pillars

CRANE looks for:

- A technology-enabled service, integrating citizens health data
- fitted and designed for European healthcare and care systems
- flexible to tailor the CRANE model to each of the participant procurers

Solution

CRANE model is based in two pillars

Target patients

**cardiovascular diseases
(CVDs)**

**chronic obstructive pulmonary
disease (COPD)**

**diabetes
(type 1 and 2)**

Consortium

Seven partners from **four European countries** and **three rural regions** with high levels of people over 65 and a common and urgent need for health and care innovation.

Buyer Organizations

- 55,342 km² → 4,6 inhabitants/km²
- 15 municipalities
- **South Lapland:** seven western municipalities of Västerbotten
 - 1-2 inhabitants/km²
 - 27% of the population > 65

JUNTA DE EXTREMADURA

Vicepresidencia Segunda y Consejería de
Sanidad y Servicios Sociales

- 41,634 km² → 25 inhabitants/km²
- 24 municipalities
- 11.5 % decline in population from 2000 to 2028
- 20.8% of the population > 65

**Regional
coordination group**
E-health and welfare technology Agder

- 16,500 km² → 18 inhabitants/km²
unevenly distributed
- 25 municipalities and 4 municipality clusters.
- 15,5% of the population > 67

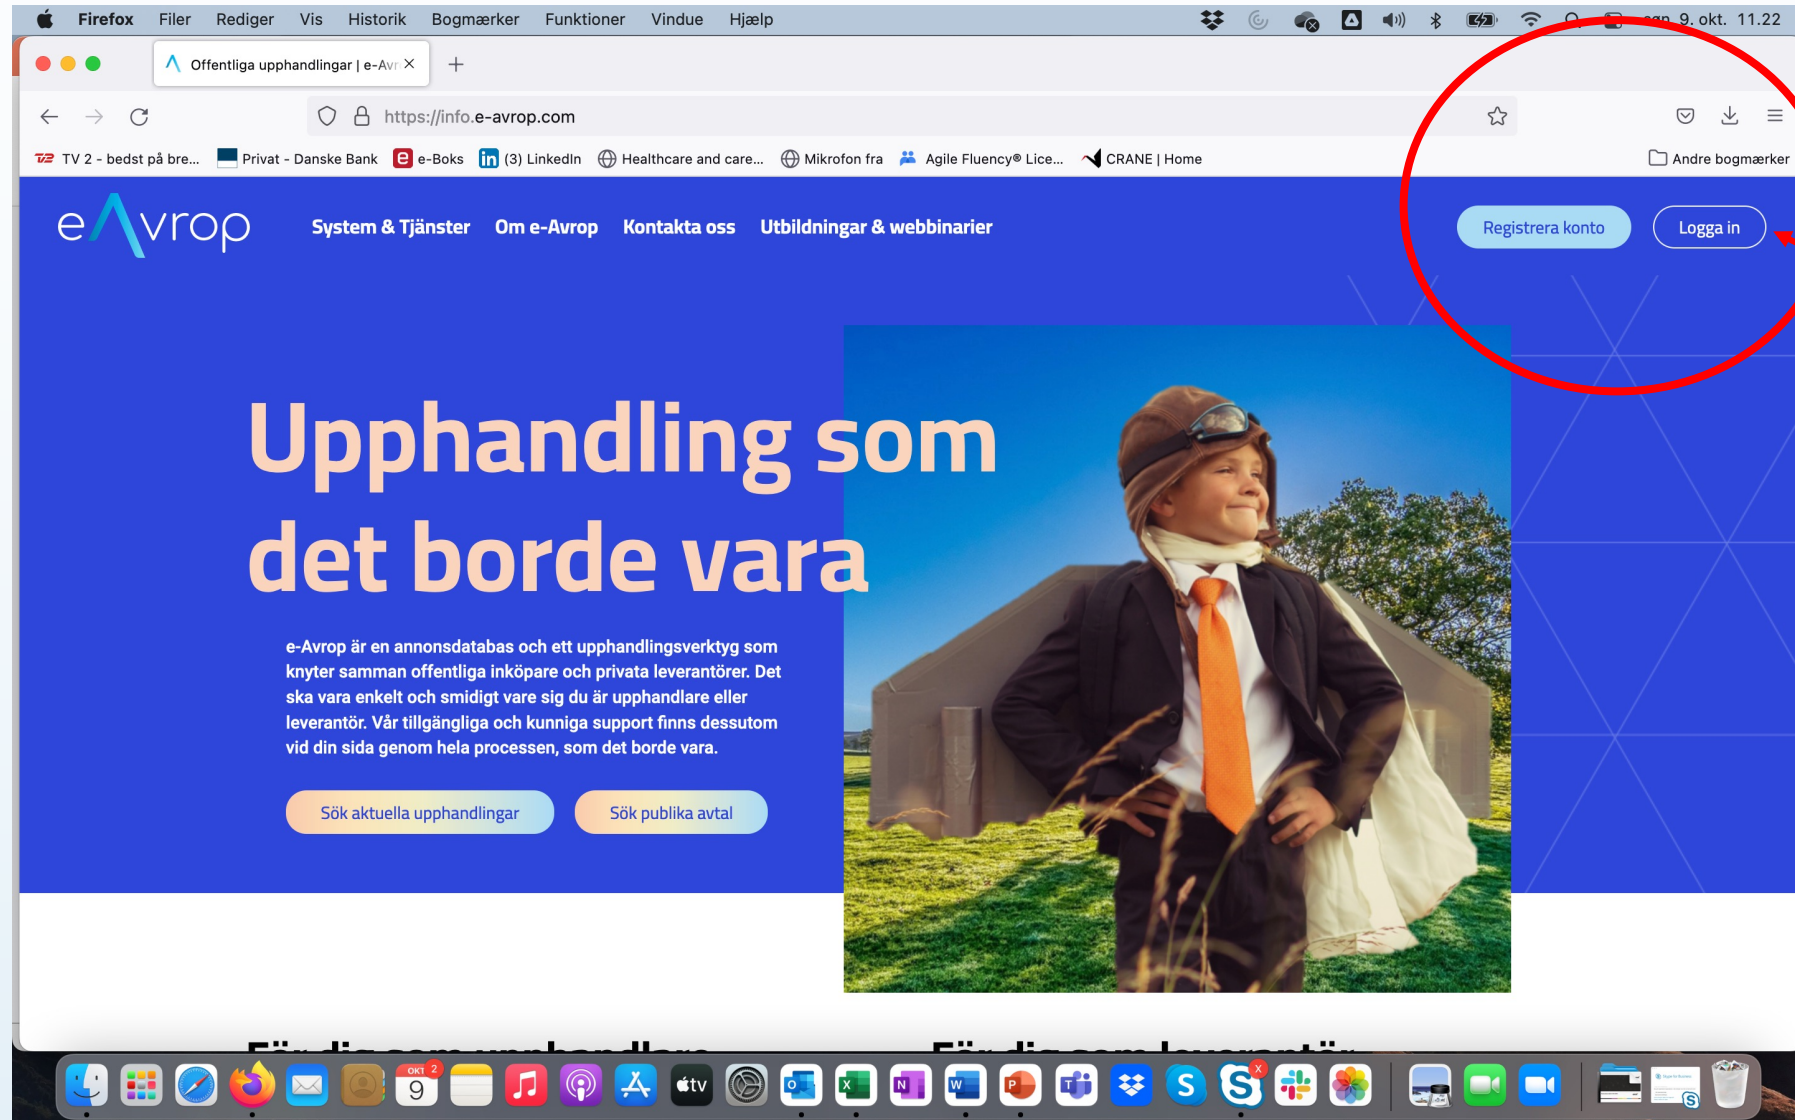

CRANE key points

We are looking for

- An **open and interoperable platform** hosting and providing access to CRANE core, computing and processing services. Potentially providing Secure Multiparty Computation and Smart Contracts capacities;
- Secure protocols for health data management through a **virtual data-lake** and a Personal Data Space (PDS). Data is not copied or moved. It resides where it is born.
- a solution for management of **informed** consent and building trust for patients to control the access to their own data;
- **services for self-management of chronic conditions** in cardiovascular diseases (CVDs), diabetes and chronic obstructive pulmonary disease (COPD);
- **evidence-backed** services for adherence, engagement and motivation.
