

# CRANE

Fabien Astic, Co-founder, Business Development f.astic@exactcure.com +33 6 73 18 25 72

# Objectives

- Become one of the CRANE services
- Participate to an integrated and tailored care model to enable self-management of chronic conditions in European rural areas.
- Help improve trust, adherence, engagement and motivation
- Facilitate self-management of CVDs and COPD

## Tech for Good Health

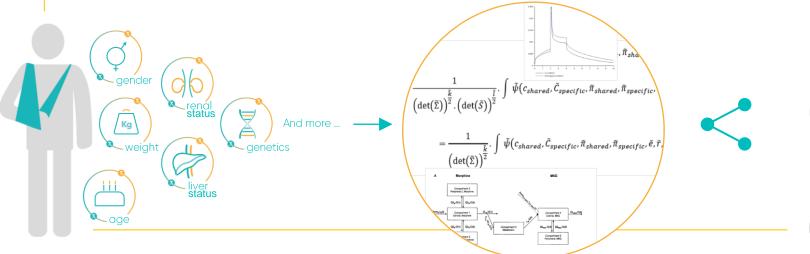

ExactCure develops a solution to personalize medications and properly use drugs

# Solution: Personalized in silico drug modeling

A *Digital Twin* to simulate the concentration of medicines in the blood of patients based on their personal characteristics (weight, renal status, genotype...)

#### For Patients

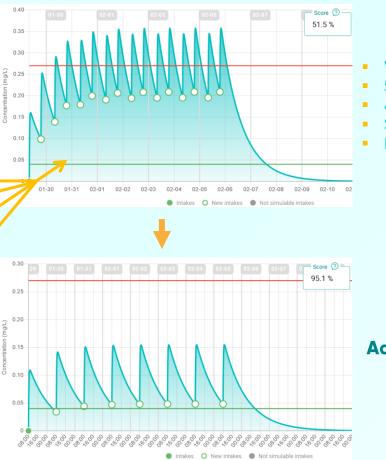

- Avoid medication errors
- ✓ Improve adherence
- Monitor in real time
- ✓ History of reported effects correlated to drug concentration
- ✓ Share with Professionals

#### Example: dabigatran

Used to treat cardio-vascular diseases

#### For Healthcare Professionals

- Woman
- 55 years old
- 45 kg
- Strong renal impairment
- Normal genotype

150 mg 2/day

75 mg 1/day

Adapt posology to each individual patient

#### Medical Device

# EXATWIN

**A Core Simulation Engine** 

MaaS = Model as a Service
"Powered by ExactCure®"
personalized PK/PD simulations

# EX/MED

**A User Interface** 

Mobile for patients + Web for HCPs incl. additional services

Can be white-labeled

Call our API to integrate simulations into your platform

# 3 innovations to Properly Use Drugs

Disruptive Usage

Monitor drug concentration

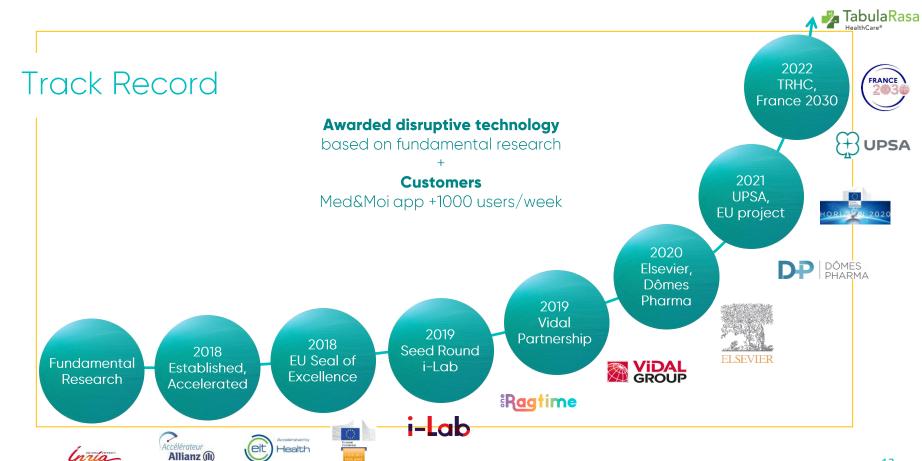

Meta-modeling

Aggregate state-of-the-art literature

Patient Feedback

Al to fine-tune models in real time

#### Projects - Finished, runnning or (in preparation)

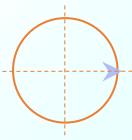

(Immunosuppression)

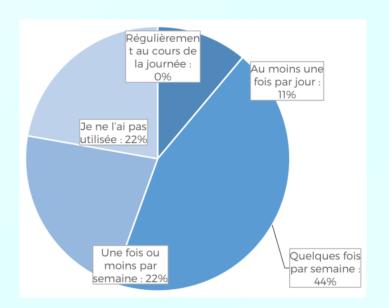

(Epilepsy)

# Results from pilot on chronic rheumatisms (2019)

## FREQUENCY OF USE

After 3 months, 75% of patients still use the app at least once a week (up to several times a day)

« ExaMed helped me, this app actually cares about me. »

# Main Awards, Prizes and Recognition

"eHealth" grant decided by the French Prime Minister

Analyzed in article by INSEAD Strategy Professor

EU Seal of Excellence. H2020 RIA Project (5% success rate)

Speaker at MIT's "Al for Healthcare" summit

From the French Ministry of Research in person

Cited in same article as Elsevier and Certara

"Most successful INNOLABS SMF" (119 EU candidates)

Featured in same broadcast as Astra Zeneca

1st prize from the French Society of Digital Health

Laureate of several FIT Health EU programs

- Propose personalized drug simulations as a CRANE service
- Participate to an integrated and tailored care model to enable self-management of chronic conditions in European rural areas.
- > Help improve trust, adherence, engagement and motivation
- Facilitate self-management of CVDs and COPD

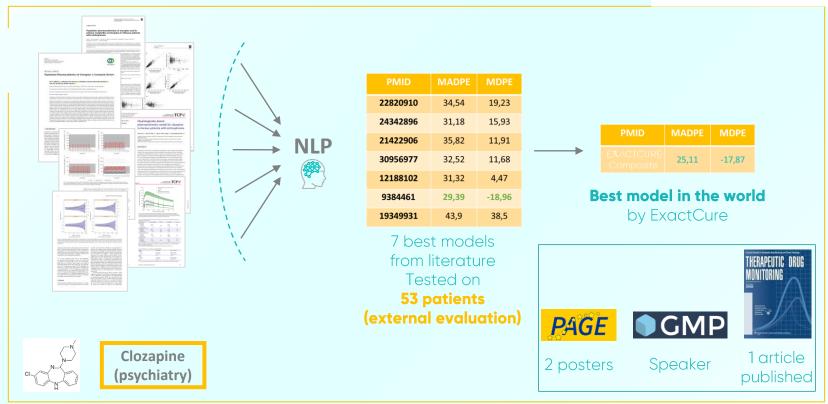

Thank-you

**Your Digital Twin for a Personalized Medication** 

# Our ambition: become the worldwide reference in personalized medication simulations

## Proven technology - Publications

#### **Download Med&Moi**

For a safer self-medication at home for the whole family

#### **Download ExaMed**

For chronic and polymedicated patients linked to their healthcare professionals
